Sponsored by:

Power Summit 2011

Power Summit 2011 will be the leading interface between Governments and the private sector for issues relating to power generation and supply and related business and investment. Sustainable power supply is high on the agenda of all countries, and for many developing countries power shortages are the single biggest restraint on economic development.

Total global energy demand is expected to grow by 49% by 2035, while net electricity generation will increase by 87% between 2007 and 2035 according to the US Energy Information Administration. At least 70% of this growth will come from developing countries with China and India expected to be the fastest growing consumers of energy. To meet this demand it is estimated that more than one power plant will need to be commissioned everyday over the next three decades. The cost of this increase in power generation is expected to be in the region of US\$13.5 trillion for transmission costs alone. While renewable energy is the fastest growing source of world energy supply, traditional energy sources are expected to meet more than three-quarters of total energy needs by 2035 assuming current policies are unchanged.

Power Summit 2011 will give Governments the opportunity to outline their future energy requirements and strategies to an audience of private sector solution providers, financiers and investors. It will also give best in class service providers and cutting-edge technology developers the opportunity to showcase their expertise.

Power Summit 2011 will be global with participation from Ministers of Power and Energy from the Commonwealth and beyond together with delegations from across the world each bringing a regional as well as national dimension to the conference. The programme will include presentations from Ministers of Energy, country specific presentations and technology focused sessions.

Who should attend?

Power Summit 2011 provides an unrivalled opportunity to network with a wide variety of national decision makers and business leaders from segments including:

- Government and Regulators
- Power Technology Companies
- Power Solution Providers
- Power Infrastructure Providers
- Power Project Financiers and Investors

 Aditya Handa, Managing Director, Abellon CleanEnergy (India)
 Jason Rosamond, CEO, Good Earth Power (Sultanate of Oman)

Nehru Room **Tidal and Wave**

Chair: Jason Hayman, Managing Director, Sustainable Marine Technologies (UK)
 Martin Wright, Managing Director, Marine Current Turbines (UK)
 Kieran O'Brien, Executive Director, Carnegie Wave Energy Limited (Australia)
 Jochen Weillepp, Managing Director, Voith Hydro Ocean Current Technologies (Germany)

Contact us to participate in Power Summit 2011

The Organisers:

Commonwealth Business Council

The Commonwealth Business Council (CBC) was established in 1997 with a direct mandate from Heads of Commonwealth Governments to promote trade and investment amongst 54 member nations and increase economic linkages with non-member countries.

CBC's goal is to achieve economic empowerment for shared global prosperity through the enhancement of private sector contribution to social and economic development.

TRADEFAIR GROUP™

Trade Fair Group

Trade Fair Group is dedicated to the creation and management of focused, innovative and targeted industry-leading events, publications and online resources that deliver results. We bring together highly qualified buying audiences, education-rich content and high-level networking opportunities, all geared toward increasing business transactions and turning knowledge into action in the markets we serve.

Global Business Reports

Headquartered in London and with offices in Istanbul, Global Business Reports (GBR) was established in 2001 in order to provide up to date and first hand information for global business decision makers.
